AMENDMENT AND RESPONSE

Sir:

This paper is filed as a correction to the response filed on April 3, 2009.

This response substantively differs from the previous response only by the addition of a feature ("while the image is moved optically by said member along said predetermined direction") to claims 10-12. For simplicity, the contents of this response replaces the previous response in its entirety.

Please amend the above-identified application as described below and consider the following remarks. **All remarks and amendments herein are made without prejudice.**

Amendments to the Claims are listed beginning on page 2 of this paper.

Remarks begin on page 8 of this paper.
